

PRESS RELEASE

LASEA announces the arrival of Christophe Seuret as head of its Swiss subsidiary

Biel/Liege, 18 March 2025

LASEA, a leading player in high-precision laser technologies, announces the appointment of Christophe Seuret as head of LASEA Switzerland.

Christophe Seuret holds a doctorate in nanomaterial physics and photonics from ETH Zurich and has 25 years of experience in the sectors of microtechnology, luxury goods, and electronics. His career path demonstrates his strong commitment to innovation and industrial excellence.

He has held several senior positions, notably in a subsidiary of a watchmaking group, where he rose to the position of CEO, before creating and managing his own consulting firm specialising in B2B strategy and industrial project management. More recently, he was in charge of commercial and technological development in a company active in innovative materials for microtechnology, contributing to the growth and innovation of the company.

"Joining LASEA is an exciting opportunity, the teams are passionate, and innovation is at the heart of every project. It is an honour to be part of the quantum revolution that Lasea is leading in the field of micro-machining. That revolution will enable the innovation of ever more precise components and miniaturised systems in innovative materials tailored to the applications of the Swiss manufacturing industry."

The arrival of Christophe Seuret at LASEA marks a new stage for our Swiss subsidiary, which plays a key role in the group's strategy. Located in the heart of French-speaking Switzerland, it benefits from its unique proximity to its customers. LASEA intends to continue its expansion and strengthen its presence in the luxury, medical and electronics sectors, capitalising on its technological expertise and know-how.

"I am very pleased that Christophe has joined the LASEA Group. With his dynamism and leadership, Christophe will actively contribute to the strategic development of the company," added Stéphane Bussa, Group CCO.

The LASEA Group:

Founded in 1999, LASEA provides laser micro-machining solutions to some of the world's most prestigious companies, including the top three Swiss watchmakers, two GAFAs companies, leaders in the eyewear industry, companies in the pharmaceutical and medical sectors (intraocular, vascular and cochlear implants), as well as several big names from Silicon Valley.

LASEA employs around 200 people and has already installed more than 3,000 systems (manual machines and production lines operating 24 hours a day) in more than 30 countries (on five continents).

In addition to its headquarters in Belgium (Liège Science Park), LASEA has subsidiaries in Mons (Belgium), Bordeaux and Besançon (France), Bienne (Switzerland) and San Diego (United States).
